General Comment

6 individual independent health (not in-vitro) studies, 13 months to 36 months in length, focusing on metal chelation of Glyphosate in the human body and at what rate Glyphosate chelates important metals, (selenium, magnesium, copper etc etc) and need to be addressed prior to any Licensing or acceptance of any prior test results performed by or represented by/with/through Monsanto, Bayer or any party with any ties or doing any business with said makers of Glyphosate, Makers of Glyphosate should be held accountable to their original claim of Glyphosate Soil safety, non DNA contaminant, being non bio-accumulative/ safe for human consumption, and completed through measures beyond their influence,
